BURLINGTON, THURSDAY, OCT. 5

## WANTED.

When you want anything, advertise in the new special column of this paper. Some bargains are offered there this week which it will pay you to read about. See page two. This paper has more than 25,000 readers every week and one cent a word will reach them all.

It remains to be seen whether the Turco-Italian war is to be classed as a "dangerous occupation."

Dr. Wiley is again in command, according to advices from Washington, those who assailed him having taken to the woods.

The arrival in this country of the Hon. H. C. Ide, United States minister to Spain, suggests the unquestioned fact that this same Vermont could unquestionably tell interesting things about present conditions in the Castilian peninsula, did not diplomacy seal his lips. Everybody who is acquainted with Minister Ide knows that he is a born diplomat.

The Montpelier Journal sagely remarks that "the contest over lieutenant-governor must now divide interest with that for attorney-general." There is one thing to be said about the contest for second place on the ticket that will not necessarily apply to the other. The mountain rule will prevent at least one-half of the fourteen counties of the State from entering candidates for lieutenant-governor.

## ADVERTISING VERMONT.

That the railroads are more alive than ever before to the value of publicity for Vermont's attractions is evident from the fact that the Central Vermont railroad has already begun preparations for one of the most elaborate projects yet devised for the advertising of the Green Mountain region next season.

General Passenger Agent John W. Hanley of the Central Vermont and Mr. J. F. Cook, official photographer for the Grand Trunk Pacific railway, arrived in the city last evening and to-day they will visit many points of interest in and about Burlington for the purpose of securing a number of views for the elaborate and beautiful illustrated publication to be issued next season.

They will proceed the whole length of the State in the same way and a little later they propose to visit Mount Mansfield for the purpose of catching, if possible, some of the magnificent scenic views to be had from the summit of the King of Vermont mountains.

Mr. Hanley says that contrary to the opinions held in some quarters the auto travel has not injured their business, for it was greater this season than ever before. He is an enthusiast on summer hotels and sees a great future for Vermont as both a summer and winter resort.

## AN INVISIBLE GOVERNMENT.

Prof. S. P. Emerson, in the course of his initial talk to the men of the College Street Church upon the results of his observations during a year's tour in Europe, emphasized the fact that Europe is largely an invisible government, while the chief characteristics of the old world governments is realism. The subject of monarchies especially are impressed through the symbols of authority.

In this connection we note an interesting characterization of the American government's lack of outward expression, contributed to the columns of the New York Globe by Dr. Frank Crane. He says:

"If you will meditate long enough on this proposition it will clear up your mind wonderfully in your fundamental thinking about politics, economics, and sociology. Our ostensible government consists of mayors, sheriffs, governors, presidents, and the like. As a matter of fact, these officers have little or nothing to do with governing us. About all that the political government does may be put into two words: First, they punish crime, and second, they collect taxes to pay themselves for this work."

"Now, the average man has nothing to do with crime. He does not commit crime, and he rarely makes the object of crime. We urge him to attend the primaries and to vote, but he remains woefully indifferent. A curious proof of my theory is that the class most active in city politics is the criminal class; for government has most to do with that class."

"But the average man is not a criminal."

## PRESIDENT TAFT AND THE CHANCE TO DO BUSINESS.

We showed the other day that the republicans can enter the national campaign of 1912 under favorable auspices by presenting in the coming session of Congress bills embodying a tariff and financial program that will tend to put business on an established basis.

That means tariff revision in accordance with the recommendations of a tariff board made after a non-partisan investigation and on a scientific basis, with ample notice to the public so that no unfair advantage can be taken of people by dealers in any commodity. It means a stable financial policy, and no radical tinkering with the nation's financial system. It means the adoption of measures that will reassure business all along the line while in no sense abating the impartial prosecution of law-breakers, whether trusts or individuals.

As the recognized head of his party President Taft is expected to take a prominent part in the formulation of policies, but the framing of measures rests with the law-making branch of our government.

The Republican party is not a one-man party, and the republicans of the two Houses of Congress can not shift their share of responsibility.

In the meantime President Taft is being urged to proceed now in this direction and now in that. The New York Sun goes to one extreme, representing as it does the orthodox financial corporation, and urges President Taft to become a rock-ribbed conservative. The Sun says:

"There is only one issue at the present time of sufficient magnitude to take a President of the United States away from his post of official duty to give oral instruction to the population between the two oceans. That is the supreme issue forced into being by the progressive disorganizers of government; the issue with socialism, disguised, half clothed or naked. Everywhere and in both parties men of patriotism and men of business are looking hard for a leader with the discernment to recognize this central fact of the situation and with courage enough to face the people and tell them the truth about it."

"Has Mr. Taft the discernment? Has he the courage? If so, Opportunity never beckoned more eagerly to the right man. If so, he will let the complexities of the Sherman act and the perplexities of tariff schedules go to Gehenna, and put himself speedily and unmistakably at the head of the conservative political forces that are bound to prevail if this republic is going to endure."

As regards the tariff, there is plainly a reaction from the time when the West was calling for the smashing of schedules generally. A continued upward movement in the cost of living may cause the pendulum to swing back again, and to oscillate until this whole question is settled.

But now that reciprocity has cleared the atmosphere the tariff question can not be settled without either adopting President Taft's tariff board program or espousing the democratic program of ripping up things generally through a sweeping revision of the entire tariff and the creation of a large free list open to all the world.

Public sentiment on the tariff question is now in a state of flux, and the drift will speedily set in one direction or the other. President Taft is called upon by the Sun to become conservative and so help business.

The democrats are already committed by their course in Congress to a free list and a tariff for revenue only.

Which policy regarding the tariff will the more help business?

Turning to the question of enforcing the anti-trust laws we find a powerful sentiment reflected in the New Orleans Times-Democrat, which says:

"Mr. Taft's desire to comfort the sorrowing and reassure the worrying is plainly manifest and manifestly sincere. His refusal to halt the enforcement of the Sherman act is surprisingly firm and unequivocal. He blends the bitter and the sweet with tact and cleverness. Yet it is hardly to be supposed that the business men who cry out against the disturbance, by a republican administration, of the order which the Republican party, through a long period of years, has sedulously fostered, will be easily pacified. Rather it is to be hoped that they will bring themselves to acceptance of the change as inevitable, and philosophically turn the energy now devoted to vociferous but unavailing protest to the readjustment of their business in conformity with the law as it has been interpreted by the court of last resort. The task may be difficult to those trained in the trust school, but it is by no means impossible. And the experience of the railways, which bent their necks to the yoke of law and regulation only after a season of furious but unavailing protest, should teach them to accept philosophically what Mr. Taft, whose party has served those many years in the capacity of next friend to the trusts, assures them is inevitable."

However we may differ regarding the personality of the head of our government, President Taft unquestionably represents the sentiment of the great mass of the American people in taking his position as a middle-of-the-road progressive republican. The New York Sun will have few followers outside of the large financial interests in calling for a cessation of the prosecution of violators of the anti-trust laws.

Indeed, the man chiefly mentioned as a possible rival for the republican nomination for the presidency of the United States in opposition to Mr. Taft is far more radical than the latter and it is to be presumed that his policies would disturb business to a far greater degree than those against which so many people are protesting in connection with the Taft administration, indicating that the trend in the republican ranks as well as throughout the country is toward progressiveness and not in the direction indicated by our luminous New York contemporary.

The great thing for the people to do is to stop waiting for somebody else to think for them. Let them settle in their own minds whether they want to smash things or to remedy defects as fast as possible without plunging the whole country into prolonged uncertainty and then settle down to business.

And nor a criminal catcher. He is busy making a living. That, therefore, which controls his living and sets bounds and conditions for his business is that which really governs him.

"The real government it follows, is not in the hands of the political officials whom we elect, but in the hands of the men of wealth, whom we do not elect."

Even if this stricture is correct, the fact remains that our government is invisible.

## WILSON'S STAR IN DESCENDANT.

Six months ago the average political observer would have been ready to assert that Governor Wilson of New Jersey had a better outlook to secure the democratic nomination for the presidency of the United States than any other aspirant. Now all this has changed.

At the present time many democratic leaders are looking askance at the New Jersey executive. His transformation from an opponent of the initiative, the recall and the referendum to the most radical champion of these and other measures, hitherto opposed by the orthodox democracy has been so sudden that nobody who has him classified to-day knows where to find him to-morrow.

Even Col. George Harvey, the versatile and able Vermontor, who edits Harper's Weekly and supervises the publication of other Harper publications, and who discovered Woodrow Wilson as a presidential possibility, has dropped him like the traditional hot potato.

The latest evidence of Wilson's swift descent down the political totem pole is to be found in his overwhelming defeat by

## ANOTHER VT. ORCHARD.

H. H. Hill Writes Concerning O. H. Rixford's Apple in Highgate.

To the Editor of The Free Press:

Appreciating your effort to direct attention to the possibilities of Vermont for the production of fruit, I thought I would write you what I saw on September 20 when I visited the Rixford orchard at East Highgate. It is located in the Highgate valley, near the line between Highgate and Franklin, on a moderately steep, rocky hillside as common to Vermont, and typical of the foothill scenery of the whole length of the State. It was once a forest of the hardwood with but little of the evergreen timber as indicated by the growth at present on the hillside in the locality.

I am obliged to leave out of this account much of the data which I would like to use on account of its owner, O. H. Rixford, and family being away at the State fair. This orchard was planted some 45 years ago by the father, O. S. Rixford, of the present owner, the well-known manufacturer of shoes and axes. He cut off the original growth and reseeded some scattering scrub apple trees suggested the idea and planted this orchard among the stumps and rocks, where the plow had not turned a sod and so far as I could see, has never been plowed. The orchard is irregular on account of rocky ridges, interrupting the regular planting of solid systematic orcharding. But being a gentleman of the old school and a graduate of Brigham Academy at Bakersfield, he developed a character of sturdy honesty, high judgment and sagacity, such as we are the better for having known. He visited me at my home nearly every year for the last 15 years of his life. He showed the best of judgment in planting the orchard, and he cut off the original growth and reseeded some scattering scrub apple trees suggested the idea and planted this orchard among the stumps and rocks, where the plow had not turned a sod and so far as I could see, has never been plowed. The orchard is irregular on account of rocky ridges, interrupting the regular planting of solid systematic orcharding. But being a gentleman of the old school and a graduate of Brigham Academy at Bakersfield, he developed a character of sturdy honesty, high judgment and sagacity, such as we are the better for having known. But being a gentleman of the old school and a graduate of Brigham Academy at Bakersfield, he developed a character of sturdy honesty, high judgment and sagacity, such as we are the better for having known. He visited me at my home nearly every year for the last 15 years of his life. He showed the best of judgment in planting the orchard, and he cut off the original growth and reseeded some scattering scrub apple trees suggested the idea and planted this orchard among the stumps and rocks, where the plow had not turned a sod and so far as I could see, has never been plowed. The orchard is irregular on account of rocky ridges, interrupting the regular planting of solid systematic orcharding. But being a gentleman of the old school and a graduate of Brigham Academy at Bakersfield, he developed a character of sturdy honesty, high judgment and sagacity, such as we are the better for having known.
